

GoldSTEM_Lesson_02_Breadboard

The Breadboard

The breadboard is used to connect electronic components together.

There is a + positive and – negative rail on either side of the breadboard

All of the pins on each of the positive rails are connected together. Denoted by the red line.

All of the pins on each of the negative rails are connected together. Denoted by the blue line.

You will see rows 1-30 and columns abcde and fghij

The columns abcde for each of the rows are connected together. Denoted by the black line.

The columns fghij for each of the rows are connected together. Denoted by the green line.
